

October 3, 2019

To whom it may concern,

I have been Mrs. Joann Bashinsky's physician for well over five years.

Based upon a recent physical exam including Mini-Mental Status Exam (MMSE) performed by me on October 3, 2019, upon a review of the recent consult by a geriatrician, and upon a review of a recent consult from a neurologist, Mrs. Bashinsky does not have dementia nor psychiatric issue. She has had a recent side effect to a medication.

She is competent to make decisions for herself.

Sincerely,

A handwritten signature in blue ink, appearing to read 'W. Robert Spiegel'.

W. Robert Spiegel M.D.
